

Tech tool row 1 checklist

- My tool has at least five pages.
- I included navigation controls that allow a visitor to access every page. A visitor can get back to the home page from every page.
- My design is consistent throughout. I use consistent fonts and theme on every page.
- I avoid garish colors and strange fonts.
- I include at least one embedded object (Google map, Youtube video, Voki, etc.)
- I include a graphic or image (properly credited) on at least three pages.

If doing a website:

- I have a welcome page.
- I have an "About Me" page which includes a version of your educational philosophy
- I have a classroom calendar page.
- I have an assignments page.
- I have a "Contact me for more information" page (this might be a good place to embed a map to your school).

If doing a course wiki:

- My landing page (home page) is introducing the goals of the course.
- I include a page with background information on the course subject.
- I include a course schedule page.
- I include a course readings page.
- I include a course assignments page.

If doing a virtual field trip:

- My landing page explains what the field trip will explore.
- My field trip has three "stopping off" points.
- Each "stopping off point" provides an explanation of the spot, with an activity or guiding question for the visitor.
- I include a final page summarizing the field trip, and suggesting where the visitor might go from here.
